3 distinctive textures. 40 brilliant colors. One great finish.

PebbleTec®

ENDURING NATURAL ELEGANCE™

Pebble Tec® brand pool finishes deliver an elegant, long-lasting beauty combined with resilience and durability. This original pebble finish is made up of naturally polished pebbles creating a texture that has a slightly bumpy feel with a non-slip surface. Its unique characteristics allow a pool to blend with landscaping and water features creating the most natural pool imaginable.

PebbleSheen®

ENDURING REFINED ELEGANCE

Pebble Sheen® brand pool finishes provide the natural beauty and durability of original Pebble Tec, combined with a smoother texture. Pebble Sheen pool interiors are lightly buffed to create a luxuriously refined feel with the look of rich granite.

PebbleFina®

ENDURING OLD WORLD ELEGANCE

Pebble Fina® brand pool finishes combine old world elements with new world technology producing a smooth finish and classic appearance. Reintroducing silica and other natural materials into the cement mixture reinforces the durability of the finish. The addition of colorful aggregates and seashells from around the world enhances its unique beauty.

★ **Star Dust** Brilliant pulses of light dazzle the eye in an already stunning pool finish. Witness the reflection of the sun's rays giving off eruptive bursts of luminosity and evening lights exuded energy like stars in the night sky. Star Dust is currently only available in Black Galaxy Pebble Fina.

Color uniformity of Pebble Fina® finishes
The application process of Pebble Fina may result in an unevenness of color or swirling effect. This is part of the intended look.

Actual finish and water color may differ from printed samples. Variations in color, shade and exposure are normal. The water's depth, angle of sunlight and surrounding landscape can all be determining factors. Actual finish samples produced by Pebble Technology, Inc. should be wet before viewing. Pebble Technology, Inc. strongly recommends viewing pools before deciding on a color. Your pool builder/installer may be able to provide pools to view.

⚠ **Disclaimer:** Some colors contain seashells, such as abalone and mother of pearl. The shells are made up of material from seawater and from a living mollusk. Due to the nature of shell materials and variables of water chemistry, Pebble Technology, Inc. cannot guarantee the shell materials themselves against changes in color or brilliance. See warranty form for all limitations.
